

Suggestions increase the Voters visiting for the Registration Record

Tammuz Organization for Social Development submitted a message to the High Independent Commission of Election, requesting the commission to exert more seriously to accelerate distributing the voters' cards on. The organization also requested to provide the facilitations that are required to guarantee the constitutional rights of citizens throughout the election. Tammuz organization stated that the commission has to eliminate the impediments that obstruct the registration of the voters in the record. These obstructions are for instance, depending on the passport to register the individuals who have no food cards. The reason behind using the passport is the citizenship is the origin of the Iraqis not the food cards. The second reason is that the food card has many flaws and defects. Moreover, allowing the citizen to change his/her registration record from one governorate to another as it is right of the Iraqi citizens to reside in any district in Iraq.

On the other hand, we believe that the period of voters registration from August 22 2009 to September 21 2009 is not adequate. We also proposed in the message to open centers in other registration period for one week at least to accomplish dispensing the voters' cards and to have the cards being examined carefully by the voters.

Alternatively, Tammuz organization pointed in another message to the commission and its positive role in the media propaganda to aware about the significance of the voters cards. The commission broadcasted many TV shows in many channels as well as the newspapers. The commission put on the shoulder of the political parties and entities to aware their supporters about the case of voters' cards. The commission also mentioned the limitedness of the NGO activities as well as the non-responsive phenomenon of the Iraqi journalists to comment or have essays about the importance of reviewing the registration record.

The organization pointed out the fragility of the promises that the winning lists had promised to accomplish. There is also the fragility of services, no endeavors to solve issues of the displaced, widows, retired and the politically discharged. Tammuz organization referred to the vulnerability of the government performance, the palpable conflict to ascend the pyramid top of the presidency, which, it is as well as many other issues lead to the drawback of registration record.
