

## **Towards commitment in holding the electoral campaigns in time and according to the disciplines and rules**

We are looking forward through the electoral process to have transparent election in Iraq that conforming the standards and rules of election and under natural conditions. The natural conditions of implementing the election is considered motivation factors for the electors to participate actively and positively in balloting. We are on the other hand very regretful for some extreme statements from nominated lists and leaders. Some others began to propagate for the election even before the beginning of campaigns in an incorrect way. The propagation campaign beginning is connected by the decision of Iraqi High Election Commission (IHEC) announcement to begin the election. These lists have violated the rules of the IHEC as the commission assured that the propagation would not be initiated unless it completes the accreditation for the candidates and their legal qualifications.

The election campaign is one of the important stages in the election. The candidates are allowed in to identify their selves for the electors as well as their potentialities, qualifications, experience, goals, to implement the electoral promises. One significant factor in rendering successful election is the perseverance to standardize the election campaigns. Therefore, the pro-activity of some candidates is considered violation for IHEC rules and spoilage to the principle of efficiency.

Our organization is looking for integrated and free election. Starting from this principle, we present our readiness to implement our plan accurately. We will summarize our observation through out the electoral process, whether on the lists activities or about the violations those take place. We will monitor the performance of IHEC comprehensively, transparently, and will present credible, periodical reports in this concern.
